

PRIYADHARSAN

Aspiring Software / Data Science Engineer

8072465380 | privadharshanvs6@gmail.com | Virudhunagar, Tamil Nadu, India

OBJECTIVE

Engineering student with hands-on experience in Flutter app development, data science, and machine learning, seeking a full-time software engineering role to apply strong problem-solving and analytical skills to real-world products.

EDUCATION

B.E./B.Tech, Computer Science / related discipline

[Start Year] – [End Year]

Hindusthan College of Engineering and Technology (HICET), Coimbatore, Tamil Nadu, India

- Relevant coursework: Data Science & Intelligent Analytics, Theory of Computation, Design & Analysis of Algorithms, Microprocessors & Microcontrollers

TECHNICAL SKILLS

- Languages & Tools: Python, Dart, Flutter, Git
- Data Science: NumPy, Pandas, data visualization, exploratory data analysis (EDA)
- Machine Learning: Regression, clustering (K-Means, DBSCAN, GMM, Hierarchical, Spectral, Fuzzy C-Means, Mean Shift), anomaly detection
- Mobile Development: Flutter (Firebase Auth, Firestore, PDF generation, app architecture)
- Core CS: Data Structures & Algorithms (Merge Sort, Quick Sort, Dijkstra's Algorithm, Strassen's Matrix Multiplication), Automata Theory (DFA, NFA, Regular Expressions), Computer Architecture (8085, 8086, 8051)

PROJECTS

LabCare – Medical Diagnostic Lab Management App

Flutter, Firebase Auth, Firestore

- Built a full-featured Flutter application for a diagnostic lab, covering authentication, appointment booking, patient records, test results, and a staff dashboard
- Implemented automated PDF report generation and a billing module, resolving cross-platform build issues (Gradle/Kotlin caching, Java environment configuration)

AI-Driven Anomaly Detection in Component Burn-In & Screening

Smart India Hackathon (SIH) 2026 – Problem Statement by ISRO, Department of Space

- Designing an ML pipeline to detect dynamic/relative outliers in parametric time-series data (e.g., leakage current, propagation delay) across multiple burn-in checkpoints
- Developing a regression model to predict long-term parameter drift from early-stage readings, optimizing for low false-negative rate and explainability for QA inspection

Data Science Learning Track – Titanic Dataset Analysis

Python, NumPy, Pandas, Matplotlib

- Performed structured EDA and applied statistical concepts as a data science consolidation project

CERTIFICATIONS / ADDITIONAL LEARNING

- Self-directed data science roadmap covering statistics, linear algebra, and applied Python (NumPy, Pandas, SciPy, statsmodels)

INTERNSHIP

Intern

[Duration]

Rail Info Tech, Madurai

- [Add 1–2 lines on your role/tasks during this internship]
